Description
65/35 alloy is also known as Yellow Brass which contains 65% copper and 35% Zinc. It has an excellent capability of being cold worked. The forming property of this alloy meets the demand of many applications. They have the optimum combination of strength and ductility in the copper-zinc alloys, coupled with good corrosion resistance.

Value Proposition
<ul style="list-style-type: none">● Competitive Pricing● Flexible LME price fixation● Product Customization● Quality Assurance● Committed to deliveries● Standard export pallet packing
